

System PURE FS

Rw up to 40 dB

100% transparency
effect

Fire resistance
EI30/EW30

The PURE FS system is a single-glazed solution for EI30/EW30 fire-rated glazed walls that offers enhanced security while maintaining an elegant and spacious aesthetic appearance. The 30 mm high, 40 mm wide profile design minimises visible aluminium components, providing a 100% see-through effect, while concealed seals enhance this impression. Furthermore, the PURE FS system facilitates acoustic comfort for users, offering sound insulation of Rw 38 dB - 40 dB. Glass walls in this system are an optimal choice for modern interiors, where aesthetics and fire protection requirements must be considered simultaneously.

Single-glazed system

Structural profiles 30 mm high and 40 mm wide
in any colour from the RAL palette

Maximum height 3000 mm

Fire resistance EI30/EW30

Aesthetic and minimalist design

Invisible gaskets
