

System

PURE LOFT

Rw up to 39 dB

Easy and quick
to install

Any arrangement
of muntins

The PURE LOFT system is a solution designed to create an industrial-style space.

Decorative muntins, applied to the glass sheet either vertically or horizontally, allow the user to achieve a customized loft decoration. Furthermore, the PURE LOFT system enables the integration of an installation mullion on the frame profile, thereby offering greater flexibility in interior design. The profiles, which have a height of 25 mm or 30 mm and a depth of 22 mm, as well as sound insulation parameters of Rw 33 dB - 39 dB, make this system an ideal solution for modern office environments.

Single-glazed mullion system

Structural profiles 25 or 30 mm high and 22 mm wide in any colour from the RAL palette

Maximum height 3500 mm

A possibility to install both horizontal and vertical mullions

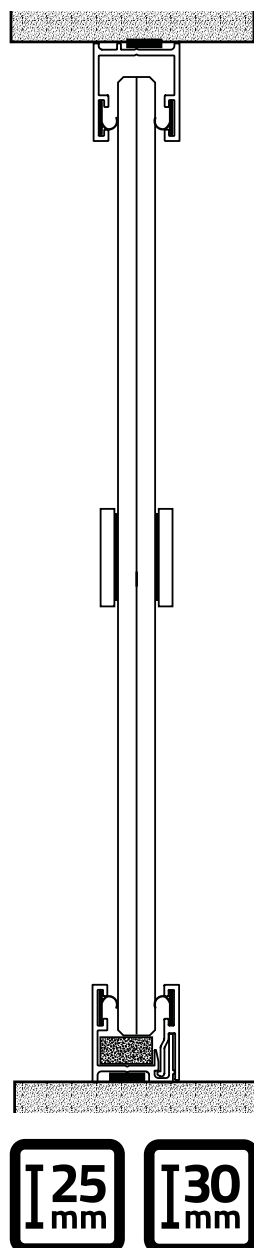

Invisible gaskets
