

System SILENCE LOFT

Rw up to 53 dB

Profiles and muntin bars painted in any RAL colour

Industrial style

The SILENCE LOFT system is an industrial aluminium and glass solution that can be easily customised to suit a range of design requirements. The painting of profiles and muntins in any RAL colour and the option of using a smart LCD film with variable translucency allow the walls to be designed to be functional and to match the style of the entire interior. The system is defined by profiles that are 25 mm or 30 mm high and 78 mm deep, as well as high acoustic parameters reaching Rw 53 dB. A wall in the SILENCE LOFT system can reach a height of up to 4036 mm.

Double or single-glazed system

Structural profiles 25 or 30 mm high
and 78 mm wide in any colour from the RAL palette

Maximum height 4036 mm

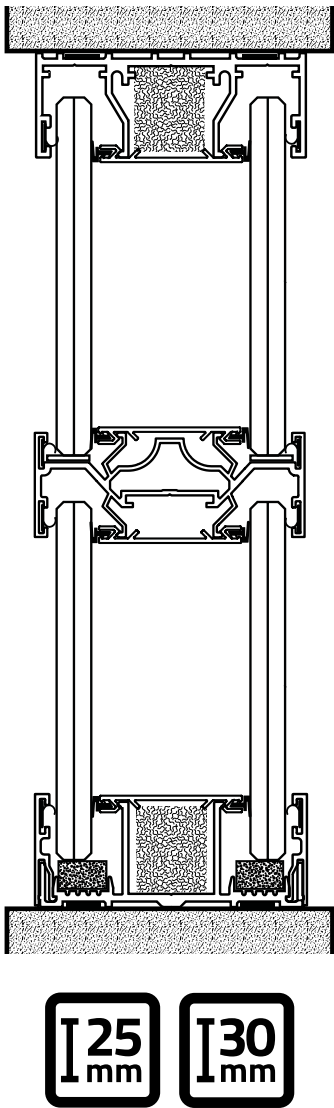

Aesthetic and minimalist design

A possibility to install both horizontal and
vertical mullions
