ULTRA SILENCE

Rw up to 52 dB

Easy and quick
to install

For demanding
interiors

ULTRA SILENCE is a double-glazed, no-muntin structure that sets new standards for acoustics (Rw 44 dB - 52 dB) and aesthetics in interior design. Thanks to these parameters, the ULTRA SILENCE system is able to guarantee peace and discretion even in the most discerning spaces. The aluminium profiles, which have a depth of 100 mm and a height of 25 mm or 30 mm, provide a solid yet lightweight structure, which is further enhanced by the concealed seals. ULTRA SILENCE system allows glazing to be created with a maximum height of 3,500 mm, providing optimal light and space while maintaining the highest acoustic performance.

Double-glazed system

Structural profiles 25 or 30 mm high and 100 mm
wide in any colour from the RAL palette

Maximum height 3500 mm

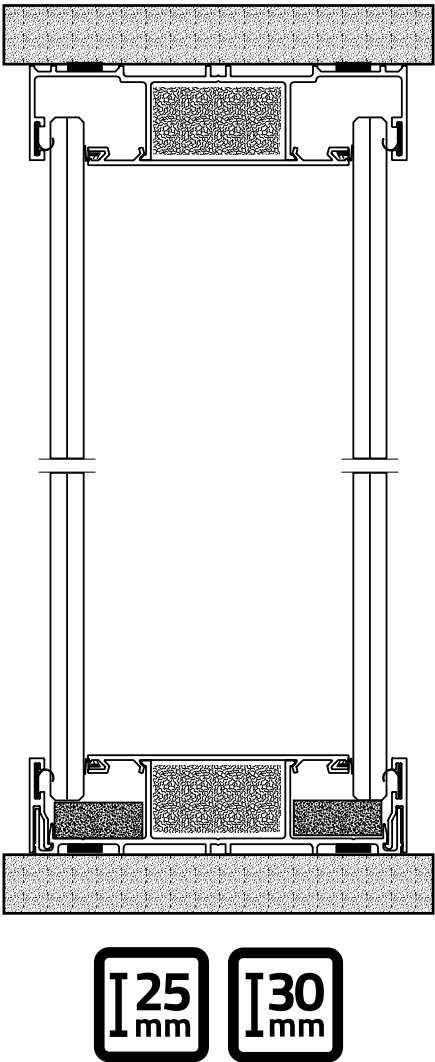

Aesthetic and minimalist design

Invisible gaskets
