

A photograph of a modern office interior featuring several mobile walls. Some walls are solid and light-colored, while others are glass, revealing an office space with desks and chairs in the background. The ceiling has exposed pipes and lights.

ZIGZAK

M O B I L E W A L L S

ZigZak mobile walls are the ideal solution for flexible office spaces. This manual or semi-automatic system allows for quick space reorganization, enhancing the efficiency and adaptability of any work environment.

The glass modules are distinguished by their high transparency, with profiles taking up only 13% of the surface area. Furthermore, the choice of RAL colours for the profiles and the finishing of the solid modules with chipboard, laminate, veneer, wallpaper, sheet metal, felt or dry-erase board allows the wall to be adapted to any interior. The acoustic performance also changes depending on the choice of glass, solid or mixed modules, from Rw 39 dB to Rw 54 dB.

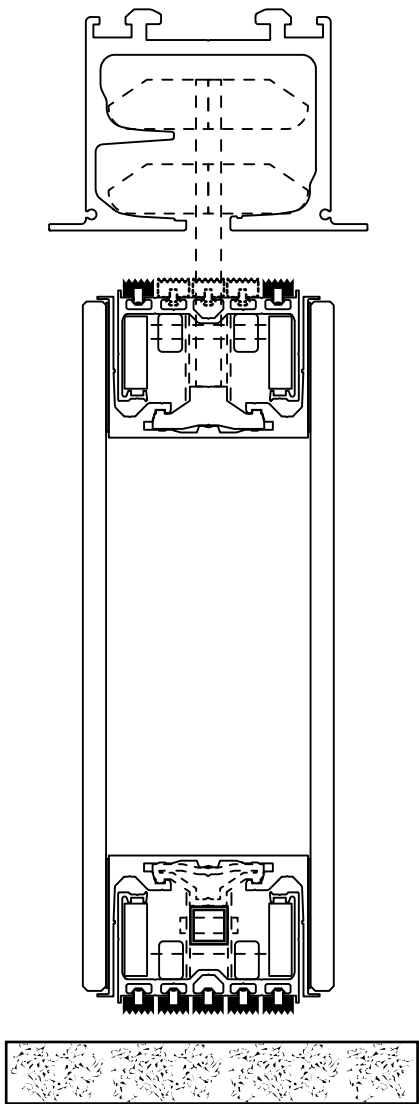

ZigZak mobile walls have been recognised in high esteemed competitions.
